## Professional Summary

Detail-oriented and analytical final-semester M.Sc. IT candidate with a strong foundation in full-stack development using C# and the .NET ecosystem. Proven capability in architectural design and secure data handling through the development of a comprehensive University Alumni Network and Endowment Contribution Tracker. Adept at transforming complex institutional requirements such as financial transparency, secure payment gateways, and community engagement modules into scalable web solutions. Passionate about software architecture, robust data modeling, and leveraging modern development practices to solve real-world institutional challenges.

## Education

- MSc IT**  
Cluster University  
Srinagar

*Current*
- Bachelor of Science**  
Cluster University  
Srinagar

*(2019 - 2022)*

10th Standard – JK BOSE (2016) | 12th Standard – JK BOSE (2018).

## Interests & Research Focus

**Enterprise Software Architecture (.NET Core):** Deepening research into Clean Architecture, Dependency Injection, and Repository Patterns within C# to build modular, maintainable, and highly decoupled enterprise applications.

**Secure Financial Engineering & Payment Gateways:** Exploring secure integration patterns for financial transactions, focusing on PCI-DSS compliance, cryptographic auditing, and building robust logging systems for institutional endowment tracking.

**Data Analytics & Relational Modeling:** Researching optimized schema design and query optimization via Entity Framework (EF) Core, specifically for tracking complex financial contributions, tiered alumni tiers, and generating institutional data reports.

**Identity Management & Role-Based Security:** Investigating advanced authentication and authorization frameworks (like ASP.NET Core Identity) to implement secure, multi-tier access control for university administrators, alumni, and auditors.

**Community Engagement Dynamics:** Analyzing UX/UI design patterns that drive user retention and data accuracy in professional networking platforms, with a specific focus on automated alumni verification workflows.

## Skills

Proficient in ASP.NET with C# full stack web development.  
Experienced in HTML, CSS, JavaScript and modern web technologies.  
Knowledge of database management and backend development.  
Strong analytical, problem-solving and communication skills.  
Experienced in organising and providing technical support at international academic conferences.
